Office Action Summary	Application No. 10/616,620	Applicant(s) HEMMINGER ET AL.	
	Examiner Ernest F. Karlson	Art Unit 2829	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

It is requested that copies of all of the foreign references and copies of all of the non-patent literature references cited in the IDS of August 13, 2003 be supplied for the file of the present application. The references requested were supplied for the file of S.N. 08/660,709 or a parent of S.N. 08/660,709 but in the process of a lengthy prosecution many of the references have been lost or misplaced either in whole or in part.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to an electronic energy meter, classified in class 324, subclass 74.
- II. Claims 11-16, drawn to an electronic energy meter, classified in class 324, subclass 74.

The inventions are distinct, each from the other because:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require all of the details of the subcombination and claims 11-15 serve as evidence claims that such is the case. The subcombination has separate utility such as by itself for its intended purpose or in a different combination.

Art Unit: 2829

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at telephone number 571-272-1961.
